## RESTRICTED SUBSTANCES LIST FOR LEATHER

Page 2/9

### Scope of the document

This document defines the list of restricted dangerous chemical substances and testing requirements in the context of leather compliance as specified by AQC.

To define the limits present in this Restricted Substances List (RSL), AQC takes into consideration all the current international regulations for dangerous substances available and select the strictest limit. The list of chemicals present in this document has been selected on a risk-based approach completed by AQC experience and knowledge.

International regulations mentioned in this document are:

Abbreviation	Regulation	Country	Comment
16CFR1303	Ban of lead-containing paint and certain consumer products bearing lead-containing paint	USA	-
EU 2016/425	Regulation (EU) 2016/425 of the European Parliament and of the council of 9 March 2016 on Personal Protective Equipment	European Union	pH limits present in NF EN 420 norm Protective gloves - General requirements and test methods - Gants de protection
EU POP	Regulation (EU) 2019/1021 of the European Parliament and of the Council on persistent organic pollutants	European Union	-
GB 20400-2006	Leather and fur—Limit of harmful matter	China	-
JP112	Law on Control of Household Products Containing Harmful Substances	Japan	-
OChim	Ordinance on Protection against Dangerous Substances and Preparations	Switzerland	-
ORRChim	Ordinance on the Reduction of Risks relating to the Use of Certain Particularly Dangerous Substances, Preparations and Articles	Switzerland	-
Proposition 65	Safe Drinking Water and Toxic Enforcement Act	USA (California)	-
REACH XIV	Regulation (EC) no 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)	European Union	Annex XIV Substances subject to authorization
REACH XVII			Annex XVII Substances subject to restriction
REACH SVHC			Substances of Very High Concern

### Specific AQC consideration

In the column for regulation, "AQC" stands for extra-legal limit set by AQC in a pro-active way:

- "AQC" alone is applied for substances without known regulation.  
For some substances, AQC performs testing without limit (for information) or with a limit concentration.
- (AQC) after a regulation indicate that the scope has been enlarged to leather by AQC or that the limit applied by AQC is lower than requested by the more stringent regulation.

### AQC limit for REACH SVHCs

Article 33(1) of REACH requires that a supplier of articles containing a SVHC included in the Candidate List for authorization in a concentration above 0.1% (w/w) has to provide relevant safety information to the recipients of these articles (Watch Brands). Upon request of a consumer, Watch Brands have to provide relevant safety information about the SVHC to this consumer (Article 33(2) of REACH).

This requirement is also present in Swiss ordinance OChim, article 71.

 ASSOCIATION POUR L'ASSURANCE QUALITÉ DES FABRICANTS DE BRACELETS CUIR	LIS001_13
<b>RESTRICTED SUBSTANCES LIST FOR LEATHER</b>	Page 3/9

There is no regulatory requirement to limit SVHC content in articles to 1'000 mg/kg. Nevertheless, AQC Bracelet manufacturers limit all SVHC listed substances to 1'000 mg/kg in leather bracelet and in leather before manufacturing.

#### AQC limit for Proposition 65

For substances listed in the Proposition 65 California, AQC limits take into account the limit in articles present in the case law of Proposition 65 and more precisely the limits indicated in the reformulation injunctions of settlements and judgements.

AQC considers in case law leather articles and related articles to the watch bracelet but also any other article with a similar exposure scenario (skin contact).

For substances without any indication of a limit in articles, AQC performs testing of a risk-based selection of substances potentially used for leather production and keeps available for Watch Brands all the data as a support for labelling decision.

#### AQC limit for EU POP

AQC limits for substances present in EU POP regulation are in full accordance with the terms detailed for each substance within the annexes.

For PFOS & related substances, by default the limit applied in this RSL is 1 µg/m<sup>2</sup>.

Nevertheless, as indicated in ECHA Q&A 1851 version 1.0 of 23/09/2021, the limit to be applied is different from a non-coated leather to a coated leather.

The testing scheme to be performed and decision rules are detailed in AQC procedure PRO034.

#### AQC requirements for laboratory testing

- Sample picture

Picture of leather samples received by the laboratory must be taken **without** plastic bag.

- Sample preparation

Leather sample preparation requested by AQC is the one indicated in the chapter "Sampling and sample preparation" of the testing methods indicated in the present RSL.
